Food Waste Across the Supply Chain: A U.S. Perspective on a Global Problem

Released March 3, 2016

Edited by: Zhengxia Dou, James D. Ferguson, David T. Galligan, Alan M. Kelly, Steven M. Finn, and Robert Giegengack

Release
This is a compilation and enrichment of papers presented at The Last Food Mile Conference held at the University of Pennsylvania in December 2014. Topics include food waste in the industry sector and how it is handled, characteristics of food waste in restaurants and in homes, how food waste can be measured, what interventions are most effective, food recovery from the supply chain and how it is diverted and used, and how food marketing affects consumption and waste. Click links here to view the Table of Contents and the Introduction.

Press Release (results two weeks after release)
- Press release went to 7,625 e-contacts (1,356 media) resulting in 1,658 opens/interactions
- A sampling of sites where the release was picked up: American Society of Plant Biologists, FAO (Food and Agriculture Organization of the United Nations, and Recycle Exuma

Follow-On Activities

Paper Distribution
- Paper Downloads—1 year after release: 572, 2 years after release: 832
- Paper requested for use with the House Ag Committee, Mary Knigge, March 2, 2016

*Feedstuffs*, Jacqui Fatka, April 2016

 подробная цитата из документа: “Wasted food is wasted resources, and even though public awareness about the problem is rising, the amount of food recovered for humans is small. In the CAST book, Barbara Ekwall, senior liaison officer, North America, at the U.N. Food & Agriculture Organization, wrote that when food is thrown away, the land, water and energy used to produce and bring this food to the consumer have also been essentially “thrown away.”
